

Social Distancing

In the world today, we are Social Distancing. Social Distancing means I can't meet my friends and I must stay 2 metres away from everybody who does not live in the same household. The reason why we must Social Distance, so we don't contact Covid-19. Covid-19 is a disease that has caused a world pandemic. There has been positives and negatives to Social Distancing, which I will now write about.

Unfortunately, my 11th birthday was on 28th April, so I couldn't have a party with my friends. I felt really sad as I love having birthday parties and I missed my friends. However, instead my parents and sisters threw me a little party at home, and I got presents and cake. One of my presents was a kitchen mixer so I have been learning to bake delicious cakes and buns.

Due to Social Distancing, all sports training and matches have been called off. I play football, camogie, basketball and I also do horse riding, but it has given me more time to improve my skills at home and I love this because I can train with my sisters on the lawn.

I now love spending time with my family at home because before Covid-19, we were all so busy but now we have time to play with each other and I really miss my cousins in Kildare that I can't see or chat with them over a fence by Social Distancing as I am close with my cousins and I miss them a lot.

In conclusion, there is a fair share of positives and negatives, but you must look on the bright side of everything.
